Company Overview

- JVC is a leading developer and manufacturer of sophisticated audio and video products that use superior technologies to deliver high quality sound and images.
- In consumer products, JVC offers high definition displays and home theatre projectors, digital video camcorders, home theatre systems, audio components and systems, portable audio products, digital storage devices, audio and video accessories and car audio/video products.
- An innovator throughout the analogue age, exemplified by the JVC-developed VHS videocassette format, JVC has demonstrated the same innovative flair in the digital age
- In addition to consumer products, JVC offers professional electronics products and distributes a complete line of broadcast, professional, presentation and security equipment. These include cameras, professional camcorders, DVD recorders, high definition monitors, editing equipment, video/data projectors, video data recorders, storage systems and video security products.
- Since 1927 the JVC brand name has been associated with the very best in audio and video technology, and that continues to this day.

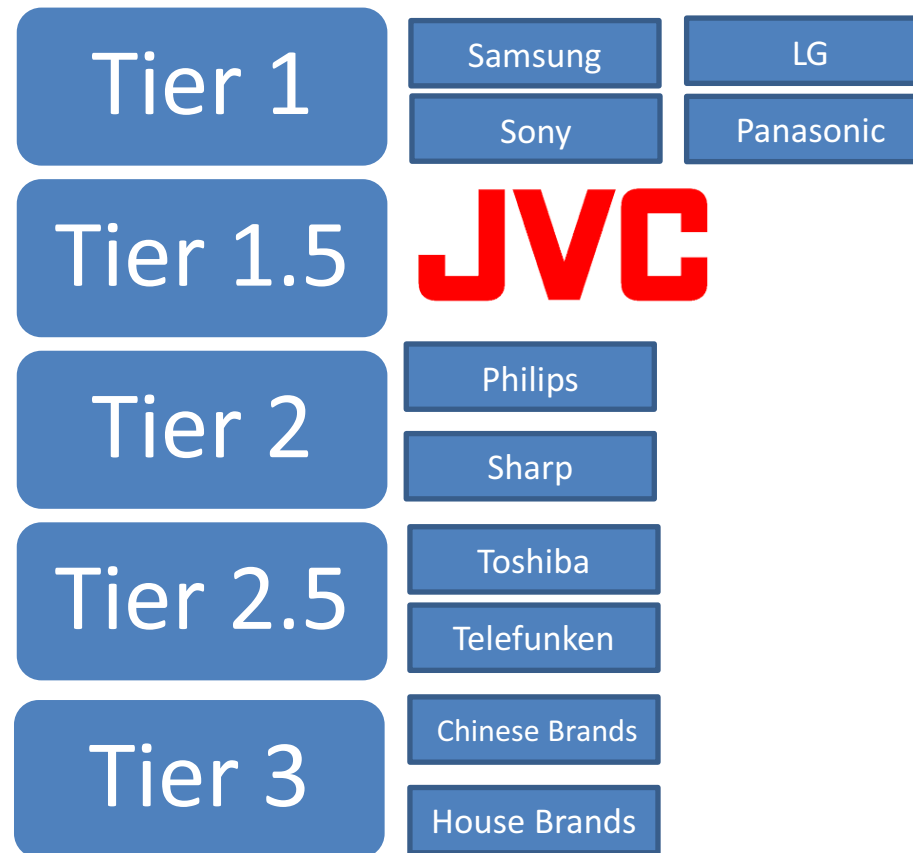

Brand Statement

The Perfect Experience

The Perfect Experience is logical translation of what our Superior Brand Performance means for our customers. In simple terms, we can tell our customers:

An encounter with superior technologies in JVC products will change your world in an instant. With JVC, music and images are richer and more vivid than you've ever known – putting the most moving experiences imaginable within your reach.
